Re: U.S. Oil Recovery Site, Pasadena, Texas

Dear Sir:

Please consider this to be a request for information from the U.S. EPA under the Freedom of Information Act pertaining to the U.S. Oil Recovery Superfund Site in Pasadena, Texas ("Site"). The information requested is as follows:

1. Information reflecting the volumes of waste that were received at the Site for treatment or disposal during the duration of its operation. Summary/chart/spreadsheet information reflecting the total waste volume over the period of years for which such information is available would be acceptable. If the U.S. EPA has such information in summary fashion on a load-by-load basis reflecting the identity of each waste generator and/or transporter for each load, then that information would be helpful. I understand that a PRP Group has been formed that is working subject to U.S. EPA oversight and whose information of this nature should be available to the U.S. EPA.
2. Information reflecting communications and other information to date between the a) PRP Group and/or its consultant and b) U.S. EPA regarding the pending remedial investigation and feasibility study for this Site.

Please contact me as soon as the above-requested information is available.

Best Regards,

Bentley Harris
